Kyushu Electric Power Company Inc.

Submission of Application of Pre Service Inspection for Review of Compliance of Sendai Nuclear Power Station Unit No.1 with New Regulatory Requirements

Kyushu Electric Power Company Inc. has received approval of construction work plan from the Nuclear Regulatory Authority on March 18, 2015, which we have submitted on July 8, 2013 as the conditions for a review to verify that Sendai Nuclear Power Station Unit No.1 complies with the new regulatory requirements.

Under the Reactor Regulation Act, we have today submitted application of pre service inspection of Sendai Nuclear Power Station Unit No.1 to the Nuclear Regulatory Authority for to receive the on-site review to check our safety measures are actually in line with the approved construction work plan.

We will respond sincerely and politely to the pre service inspection by the Nuclear Regulatory Authority and concentrate our efforts to the safety check for the restart of our nuclear power station.
