**Outline of application for the permission for a change in reactor installation license regarding efforts to improve safety and reliability of Sendai Nuclear Power Station No.1, 2**

We applied for the permission for a change in reactor installation license regarding efforts to improve safety and reliability of Sendai Nuclear Power Station No.1, 2 on December 17, 2015. This time, we reapplied the plan regarding the installation of the emergency response center, reflecting further safety measures.

The contents except the installation of the emergency response center, 'the plans regarding the installation of facilities for dealing with specific accident', 'the permanent direct current power equipment' and 'change of the receiving electricity system', weren't changed.

We submitted two applications according the difference of reviewing process of NRA as follows.
