President

*M. Urie*

To our shareholders and investors,

First, we would like to express our gratitude to all of you for your loyal patronage and support of Kyushu Electric Power.

In FY2016 earnings had been in the black for two consecutive years due to group-wide cost reduction efforts and a decrease in fuel costs because of stable operation of the Sendai Nuclear Power Station, though extraordinary losses associated with the Earthquake in 2016 were recorded.

In FY2017, we will strive to improve our financial conditions and make every group-wide effort to promote initiatives for the early restart of Genkai Nuclear Power Station and thorough management efficiency throughout business activities, etc.

Aiming to become a corporate group that provides Japan's best energy services as we declared in Kyushu Electric Power Group's Medium-term Management Policy, we will make efforts to not only provide a stable supply of electric power but also provide diverse energy services, reinforcing the organization and developing human resources that are the foundation of business.

In realizing the medium-term management policy, we regard safe and stable operation of nuclear power stations of particular importance. We are aiming to instill the continuous drive to improve the safety and reliability of nuclear power stations into our "Kyuden DNA," our inherited mission sense to provide a stable supply of electric power.

We ask for the understanding and support of all our shareholders and investors as we move toward our goals.

July 2017
