

Approval of Construction Planning regarding Newly Installed Buildings of Specific Safety Facilities for Sendai Nuclear Power Station Unit No.2

We have applied separately in three divisions for approval of construction planning regarding Specific Safety Facilities (SSFs) of Sendai nuclear power station unit No.2.

Today, we received the approval regarding “Newly installed buildings” which is the second division, from Nuclear Regulatory Authority (NRA).

We will continue to make an effort to deal with the NRA’s inspections respectfully and sincerely, for improving safety and reliability of nuclear power stations.

(Reference)

Applications for approval of construction planning were submitted separately as below with a view to install SSFs within the time required by laws.

1. Facilities installed in a reactor subsidiary building
2. Newly installed buildings
3. Newly installed facilities
