

## International Exchange Programs

Kyushu Electric Power participates in several international exchange programs. In February 2000, we signed an agreement with Thailand's Provincial Electricity Authority to exchange management expertise and power technologies. In October 2000, we signed an exchange accord with the Philippines' National Power Corporation. We have also provided training on nuclear power generation and power distribution technologies to engineers from China and Southeast Asia, and sent our own power engineers to those countries.

### Main Worldwide Alliances

(As of February, 2001)
