Kyushu Electric Power Inc.

LNG Production Starts at Wheatstone Project

We are participants in the Wheatstone LNG Project in Australia (“Wheatstone Project”) through its investment*¹. At this time, LNG Production from the Wheatstone Project commenced. The Wheatstone Project is supplied from the Wheatstone and Iago gas fields off the northwest coast in Western Australia.

We will receive 830,000 tonnes per annum*² of LNG from the Wheatstone Project.

The commencement of LNG production from the Wheatstone Project represents a significant contribution to our procurement of stable and flexible LNG supply.

“Make a brighter future for generations to come”

Kyushu Electric Power’s Mission is to contribute toward the realization of a comfortable and environment-friendly lifestyle today and for generations to come.
