

Kyushu Electric Power's Mission

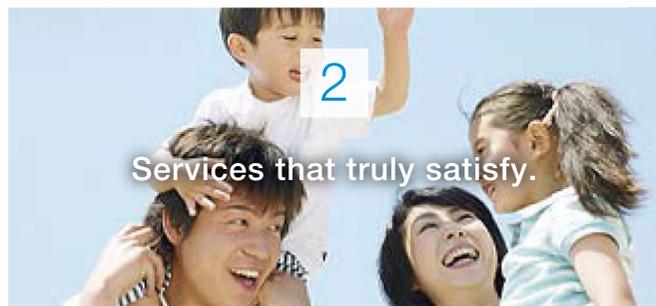

“Enlighten Our Future”

Towards a comfortable and environment-friendly lifestyle today and for generations to come.

To fulfill this mission, we are dedicated to achieving the following 4 goals:

In order for our customers to lead harmonious lives we will provide steady and reliable, Earth-friendly energy, while anticipating global trends and making full use of our advanced technology and abundant experience with energy and the environment.

We will offer services that place the gaining of trust from the customer as top priority. We would like to listen to the various voices of our customers in order to respond to their needs with services that truly satisfy.

In company with the people of Kyushu, we will work together to take action while thinking of our children's future and of the prosperity of the region. And from there, we will look to Asia and the world.

We will discover solutions that lead to a better tomorrow through honest, sincere and active discussions, believing in people's potential and mutually respecting personalities, and we will put these solutions into practice.
