

Overview of Uniper

Uniper, based in Germany, is a European energy company with global reach and activities in more than 40 countries. Uniper's operations encompass power generation in Europe, global energy trading – including among others gas, hydrogen, ammonia and biofuels - and a broad gas portfolio. Uniper procures gas — including liquefied natural gas (LNG) — and other energy sources on global markets. Uniper is a reliable partner for communities, municipal utilities, and industrial enterprises for planning and implementing innovative, lower-carbon solutions on their decarbonization journey. Uniper intends to be completely carbon-neutral by 2040. Uniper aims for its installed power generating capacity to be more than 80% zero-carbon by the early 2030s. To achieve this, the company is transforming its power plants and facilities and investing in flexible, dispatchable power generating units. Uniper is already one of Europe's largest operators of hydropower plants and is helping further expand solar and wind power, which are essential for a more sustainable and secure future. The company is progressively expanding its gas portfolio to include green gases like hydrogen and biomethane and aims to convert to these gases over the long term.

Overview of Kyuden Group and Kyuden International

The Kyuden Group is a leading energy company in Japan, reporting a net income of \$1.1 billion in FY2023. The parent company of the Kyuden Group, Kyushu Electric Power Company, has been supplying electricity to more than 7 million homes and businesses for over 70 years in the Kyushu region in the south of Japan. Its primary goal is to provide safe, reliable, and affordable energy while striving to achieve Carbon Neutrality by 2050. Kyushu Electric Power is actively driving the transition to a sustainable society by investing in nuclear power, expanding renewable energy production, and implementing climate-smart energy solutions.

Leveraging the technology, expertise, and network developed through the Group's domestic and global operations, Kyuden International engages in power generation, power distribution, and other businesses across Asia and beyond. Kyuden International intends to expand business development opportunities by cooperating with various business entities and promoting initiatives that contribute to low-carbon and decarbonization efforts tailored to the specific circumstances in each country. These efforts support the Group's vision of achieving a carbon-neutral society.
