AMEA Power and Kyuden International Sign MOU on Renewable Energy and Green Hydrogen Development

—Collaborative Effort to Achieve a Cleaner Future —

Kyuden International Corporation, a member of the Kyuden Group, has signed a Memorandum of Understanding today with AMEA Power, a company based in the United Arab Emirates that is committed to achieving carbon neutrality. The MoU outlines collaboration in the fields of renewable energy and green hydrogen.

AMEA Power, headquartered in Dubai, is one of the fastest-growing renewable energy companies in Africa, the Middle East and Asia. With presence in more than 20 countries, and a project pipeline exceeding 6 GW, the company has more than 2,600 MW in operation and under construction.

At Kyuden International Corporation, we leverage the Kyuden Group's advanced technical capabilities cultivated in Japan and overseas, to promote environmentally friendly energy solutions across Asia and the world. By partnering with organizations that share our vision, we aim to expand our business development opportunities and accelerate initiatives towards carbon neutrality, supporting the realization of a low-carbon and sustainable society.
