Kyushu Electric Power Co., Inc.

Kyuden Group Integrated Report 2025 "Watt's Next"

Today, we are pleased to announce the publication of the **"Kyuden Group Integrated Report 2025"** (in both Japanese and English), now available on our website.

Since FY2021, the Kyuden Group has been issuing integrated reports that bring together financial and non-financial information, presenting our medium- and long-term vision, strategies, and key initiatives in a unified and compelling story.

For this edition, we have renamed our Integrated Report **"Watt's Next"** and reimagined the content to highlight the Kyuden Group's distinctive growth story.

- Enhanced Investor Perspective
 - Expanded disclosure of financial strategy and corporate governance (featuring messages from the Head of Corporate Strategy and others)
- Further Focus on the Corporate Value Enhancement Story
 - Key themes highlighted through special features and articles, including Kyushu's rising electric power demand, the competitive advantages of nuclear power, prospects for renewable energy, the role of external directors, and roundtable discussions with our employees
- Shift from Exhaustive Coverage Toward More Concise Reporting
- Revamped Structure and Design

Going forward, we will continue to improve our information disclosure, including the ongoing publication of this report, to promote and strengthen engagement with our stakeholders. Through these efforts, we aim to improve and enhance our initiatives for the sustainable growth of the Kyuden Group and society.

Kyuden Group Integrated Report 2025 (For investors > IR library)
